D105 Debt Repayment Schedule

- The District's two outstanding bond issues the Series 2010B and the Series 2010C are callable 1/15/2020 and 1/15/2021 respectively.
- These bonds may be refunded in advance of the call date, however, if interest rates stay relatively stable, greater savings will be generated at the call date.
- Refunding bonds in advance of the call date results in negative arbitrage due the low investment rates on Treasury securities used in the refunding escrow and negative savings.
- When Build America Bonds (BABs) are refunded with tax-exempt bonds, the federal subsidy is lost.
- For purposes of this analysis, we assume the subsidy is 32.83% (6.2% sequestration rate reduction for 2019) of the interest cost instead of 35% on the Build America Bonds.
- A summary of the refunding scenarios is presented on the next slides.

The following options present different refunding strategies for the District to take advantage of savings if the Series 2010B and 2010C are to be refunded on a tax-exempt basis.

Option 1: Tax-Exempt Current Refunding (without cash contribution)

Wait until 90 days or less to the call date of the bonds (2010B – 1/15/2020 and 2010C – 1/15/2021) for maximum savings

Option 2: Tax-Exempt Current Refunding with \$2.5M Cash Defeasance

Same as option 1 but would allow the District to use \$2.5M cash to defease the bonds.

Option 3: Tax-Exempt Current Refunding with \$5M Cash Defeasance

Same as option 1 but would allow the District to use \$5M cash to defease the bonds.

OPTION 1: TAX-EXEMPT CURRENT REFUNDING 2019 AND 2020
