

Hapara Highlights Teacher Guide

Hapara Highlights shows you what your students are doing online right now and gives you ways to interact, engage and support learning.

In what ways can I see what students are doing online?

There are three ways to see what your students are doing online right now.

In the **Browser Tabs** section, each tile shows you the current tabs your learners have open. The bold item in each tile is the tab the student is currently viewing. The tabs listed are also links. Click on any tab to visit the site your student is viewing.

Current Screens shows thumbnail images of students' screens. Click on any picture to see (and save) a larger version.

The **Activity Viewer** gives you whole class visibility into student online activity during your Highlights session. Click on tab listed to get more information--like which students currently have the tab open, and which had it open previously open.

How can I engage with what I see?

Highlights gives you several ways to interact with what you see, which can help support a productive learning environment. Sending messages and opening tabs are great ways to get started.

How do I send a message to my class?

Highlights gives you several ways to interact with what you see, which can help support a productive learning environment. Sending messages and opening tabs are great ways to get started.

Click this icon to send learners in-the-moment feedback, encouragement and reminders.

Your message will appear as a pop up on student screens, like this:

How do I open tabs for my class?

🖙 Open Tabs

Click the Open Tabs button to open up to 10 links on learners' computers.

There are many options to tailor opening tabs for different types of lessons. For more information on opening tabs, see our guide to Opening Tabs and Focused Browsing.

How do I interact with an individual student?

Click the X next to an item to close that tab for a student. Click on the three dots to open a menu with more options for interacting with individuals.
